EUROPAN WATER-WAYS.

LONDON, Oct. 4.—A very ambitious project for the improvement of the water-ways of Europe is under consideration at Vienna and Berin. The proposal is to connect the counal, extending from the Daunbe to the Oter River. The proposal line of the canal is from a point on the Daunbe River near Vienna, through Moravia and Austrian and Frusann Dileits, to a point on the Oter not navigation of that river. The distance in a straight line is about 200 miles, but the length of the canal would be largely increased by the natural difficulties of the cuntry and by the necessity of making wide Sciutta Mountains. The settinated cost is ebout 70,030,000 florins, or about \$80,000 per nile of completed canal. The canal would action a water highway directly across the center of Europe, thus chespeting trumpermany and Austria. It would also, according to the statements of the promoters, traverse many districts which are rich in mineral deposits, and make their development easy and profitable.

WE are informed that a colored man in Mayeville, yesterday, said 13 one of his white friends that he had been directed by a Republican not to read the Danty BULLETIN. If that colored man submit to such dictation he is more of a slave than any of his race have ever been at any time in this country.
